- 4.5 The Authority's position in the international system ..... 210

Appendix..... 214

The *2015 Annual Report on the activity carried out and on the work programmes*, unless otherwise specified, presents data and reports on the work action carried out by the Communications Authority in the period from 1 May 2014 to 30 April 2015.

Unless otherwise indicated, the data have been processed by AGCOM. If no source is indicated, the data are those of the Authority.

The percentage breakdowns are automatically rounded up or down to the nearest decimal point. The total of the percentage figures thus calculated may not be equal to 100.

Furthermore, the data cannot always be directly compared with those reported in previous Annual Reports. In some cases, in fact, companies have added or re-classified data due to both changes and additions to the calculation methods (such as drivers for the allocation of income or investments) and changes in the scope of the company's economic activity; this has led to adjustments in the economic values which at times are not even marginal.

Further information and possible corrections are published on the website [www.agcom.it](http://www.agcom.it).
