The **Communication Markets Monitoring System** is a quarterly pubblication edited by AGCOM.

The values indicated in sections 1 and 3 are based on information provided by the main companies present in the electronic communications and mail and parcel delivery services markets. Regarding the section dedicated to media and internet platforms (section 2), the data refer to elaborations on information from external sources (Auditel, ADS, Audiweb and Comscore). In section 4, dedicated to the trend of national and international price indices of the markets for which the Authority is responsible, the data are provided by Istat, for the former, and from the Eurostat database for the latter.

The data collected for this edition are updated to June 2022. The percentage compositions are automatically rounded to the first decimal place. Due to changes in firms' accounting methods, some figures cannot be compared directly with those reported in previous issues.
